

# 1000 iQ

volume

BOFA's V1000 iQ high end extraction system combines extremely large filter capacity with high airflow and pressure rates, making it the ideal choice for heavy duty applications that generate large amounts of particulate and gaseous organic compounds. This unit can cater for up to 15 operators as a centralised system or can be used to extract fumes from automated soldering machines.

Performance has now been further enhanced with the inclusion of several new features including BOFA's new iQ Operating System, making the new V1000 iQ one of the most advanced system available.

The iQ system takes performance and safety parameters to a new level and ensures that maintenance, downtime and ownership costs are kept to a minimum.

### STANDARD FEATURES:

- High airflow and pressure rates
- Reverse Flow filter technology
- Airflow Management System incorporating Automatic Flow ControlReal time airflow reading
- DeepPleat DUO pre filter
- Combined HEPA/Gas filter incorporating ACF technology
- Filters with long life and low replacement cost
- Independent filter condition monitoring, display and warnings
- High contrast display

- · 'Run safe' operation
- Remote diagnostics via USB

## **OPTIONAL FEATURES:**

- VOC gas sensor (Volatile Organic Compound)
- Remote stop / start interface
- Filter change / System fail signal
- Interfacing
- On-board compressor
- Optional filter media's

High volume extraction for hand and machine soldering applications.

For high performance and long filter life
